

IB Mathematics Pathways

10th Grade Higher Algebra is the only math prerequisite to begin the IB Diploma Programme. Many math pathways are available depending on each student's level and interest.

IB Mathematics Pathways, cont.

IB Math Analysis and Approaches (AA) - for students who enjoy developing their math to become fluent in the construction of math arguments and develop strong skills in mathematical thinking; they will explore real and abstract applications, sometimes with technology, and will enjoy the thrill of mathematical problem solving and generalization

IB Math Applications and Interpretations (AI) - for students interested in developing their math for describing our world, modelling, and solving practical problem using the power of technology; for students who enjoy math best when seen in a practical context
